

Lova Rakotomavonandrianina

Design Engineer

Web Developer / Designer with 6+ years of experience designing, developing, and maintaining responsive, user-centered digital experiences for web. In short, I'm a visual designer with a programming and development skillset. Collaborative, thoughtful, and adept at bridging graphic design and frontend development. Proficient in HTML, CSS, JavaScript, CMS platforms, and UI optimization.

Work Experience

Marketing Web Developer – Logix Federal Credit Union

MAY 2026 – PRESENT

- Develop and maintain marketing web experiences using WordPress and Sitecore.

Design Engineer – Golden Hippo

APRIL 2023 – MAY 2026

- Designed, developed, and maintained responsive, public-facing corporate and ecommerce websites with emphasis on UI systems, conversion optimization, and brand consistency.
- Developed and continually improved intuitive and visually appealing user interfaces that optimize for conversion.
- Translated visual designs, and high fidelity mockups into scalable, maintainable frontend implementations using HTML, CSS, and JavaScript as well as CMS platforms (WordPress, Builder.io, Elementor).
- Optimized existing user interface designs based on user feedback, performance data, and A/B testing insights.
- Performed cross-browser and cross-device QA to ensure compatibility, responsiveness, and accessibility compliance (ADA & WCAG standards).
- Conducted QA on front-end code prior to deployment to ensure proper integration with an Angular backend.
- Submitted code for review using Git workflow, to achieve continuous improvement of frontend UI/UX.

Web Developer / Lead Web Designer – Starke Marketing

JANUARY 2019 – APRIL 2023

- Led end-to-end delivery of websites and digital marketing experiences from concept and design through development, launch, and iteration
- Designed and built responsive websites from mockups using HTML, CSS, JavaScript, and CMS platforms including WordPress, Elementor, Webflow and Shopify.
- Developed HTML email templates with a focus on responsiveness and cross-client compatibility
- Established execution standards for web and email production, improving quality, efficiency, and consistency
